After a lengthy study conducted prior to the December 13th Board Meeting, a rate adjustment of approximately 10% was voted on and approved to take effect on your February 2022 billing cycle. This adjustment is designed to cover the operation and maintenance of expenses of the district and improvement to the aging water infrastructural needs. Upgrades to an aging infrastructure are always necessary to keep up with demand, growth, and accuracy to ensure that we continue providing the best service possible for our customers. New rates are posted below:
